## **Elliott to Supply Compressors for Habshan 5 Gas Processing Plant**

Jeannette, PA, July 16, 2010 – Elliott Group, a global leader in rotating equipment design, manufacture and service, announced today that it has won a contract to supply 16 compressor trains for the Habshan 5 Process Plant, a part of Abu Dhabi Gas Industries (GASCO) integrated gas development (IGD) project in Ruwais, Abu Dhabi, United Arab Emirates. The contract was awarded by JGC Corporation and its venture partner Tecnimont, the engineering procurement contractors for the new processing plant.

The Habshan 5 project is a government initiative to help to meet growing demand for gas resources within the UAE. The project includes a gas processing plant, a sulphur recovery unit, and a natural gas liquids (NGL) recovery unit. Elliott will provide sixteen compressor trains for the gas processing unit, with a variety of fixed speed and variable speed motor drives, as well as steam turbine drives, for seven different services.

“Elliott’s ability to demonstrate our technical abilities across various applications including refrigeration, booster and residue compression, was key to satisfying the client’s needs for this crucial project” said Makoto Suhara, Elliott’s Vice President for Sales in Asia-Pacific.

“The Elliott teams in Japan and Europe worked closely with JGC and Tecnimont, supporting them throughout the bidding process,” said Oliver Conger, Elliott’s Sales Director for Europe, Middle East and Africa. “This order builds on our growing presence in the Middle East, and reinforces Elliott’s strong credentials in the gas sector.”

The compressor trains will be built at Elliott’s manufacturing facility in Sodegaura, Japan. Delivery is scheduled for late 2012.

### About Elliott

Elliott is a global leader in the design, manufacture and service of technically advanced centrifugal compressors and steam turbines used in the petrochemical, refining, oil & gas and process industries, as well as in power applications. Elliott competes against General Electric, Dresser-Rand and Mitsubishi for rotating equipment of this type. The company employs 2100 persons in 32 locations around the world. Elliott Company is a wholly owned subsidiary of Ebara Corporation, a major industrial conglomerate headquartered in Tokyo, Japan. Ebara employs 15,000 people and has sales of US \$5 billion.
