## **PAPERS AND PATENTS**

August 21, 2006

Engineers Andrew Watson and Kevin Tapper jointly applied for a patent entitled “Aerodynamic Insert for a High Speed Permanent Magnet Motor.” This is the latest in a string of accomplishments for these two engineers. Watson’s “Permanent Magnet Motor – Magnet Retaining Carrier,” was issued patent number 6,933,645 on August 23, 2005. He also presented a paper called, “Introduction to Permanent Magnet Motors and Generators for High Power and Direct Drive Industrial Applications,” at the May AVPG International Gas Convention in Caracas, Venezuela. Tapper has a patent pending of his own entitled, “Method of Compressing Lamination Stacks.” Congratulations to Andrew Watson and Kevin Tapper for continuing Elliott Company’s spirit of innovation.
