SUBJECT: **Elliott to Supply Compression Trains for Gulf Coast Liquefaction Facility**

---

Jeannette, PA – March 16 2015 –Elliott Group has been selected to manufacture three compressor trains for Cameron LNG’s new LNG Liquefaction export facility in Hackberry, Louisiana. The new facility will be adjacent to Cameron LNG’s existing LNG receipt terminal and regasification facilities.

The project includes three natural gas liquefaction trains with an approved export capacity of 12 million tpa. Elliott will supply three duplicate equipment trains with six Elliott centrifugal compressors for cryogenic, end flash gas service. When the new liquefaction facility becomes operational in 2018, it will enable bi-directional service between the terminal and the liquefaction plant.

“Elliott’s longstanding strength and experience in refrigeration compression, and our ability to meet the challenging process requirements, were instrumental in winning this order,” said Brook Tolman, Director of Global Sales. The award reinforces Elliott’s strong credentials in the LNG sector.” The compressors will be built and tested at Elliott’s manufacturing facility in Jeannette, PA.

## **About Elliott Group**

Elliott Group is a global leader in the design, manufacture and service of technically advanced centrifugal compressors, steam turbines, power recover expanders and axial compressors used in the petrochemical, refining, oil & gas and process industries, as well as in power applications. The company employs 2600 persons in 40 locations around the world. Elliott Group is a wholly owned subsidiary of Ebara Corporation, a major industrial conglomerate headquartered in Tokyo, Japan. Ebara employs 15,000 people and has sales of US \$5 billion.
